**Title:**

**SGLT2 inhibitors for Hypomagnesemia: Case Series, Observational Studies, and a Clinical Trial**

**Description:**

Sodium/glucose cotransporter 2 (SGLT2) inhibitors have emerged as a new class of drugs for treating hypomagnesemia, driven by their unique extraglycemic benefit. In this talk, I will discuss the current evidence from our most recent multicenter case series, two single-center observational studies, and interim results from a clinical trial examining the effects of SGLT2 inhibitors in patients with hypomagnesemia.

**Bio sketch**

I received my Bachelor of Medicine and Surgery (M.B.B.S.) from the Medical College of Baroda in India. Then, I completed an internal medicine residency at Cleveland Clinic/Fairview Hospital, followed by a nephrology fellowship at Wayne State University in 2015. I am a clinical associate professor and director of the Onco-Nephrology service at the University of Florida, Florida, U.S.A.
