

## **Dr Jeroen de Baaij**

*Department of Medical BioSciences, Radboud University Medical Center, Nijmegen, the Netherlands*

### **Bio-sketch:**

Jeroen de Baaij is an Associate Professor in renal physiology at the Radboud University Medical Center in Nijmegen, The Netherlands. His research focusses on the identification and characterization of new genes involved in renal magnesium reabsorption. Using a wide range of molecular, cellular, and physiological techniques, he examines new genes or new regulatory pathways in magnesium (re)absorption in the kidney.
